INOCULATION LOOPS - FLEXIBLE FEEL IN TAMPER-EVIDENT RESEALABLE BAGS

Globe Scientific's disposable inoculation loops and needles offer the most convenient and safest way of streaking culture media. These polystyrene (PS) inoculation loops are smooth and flexible to facilitate uniform streaking of culture media. The loops are packaged in tamper-evident resealable bags. All loops are sterilized by gamma irradiation. The 1µL and 10µL inoculation loops are available with the loop on one end and an integrated needle on the other end eliminating the need for a separate needle.
